WP2: Summary of the activities

ITINERIS

Activity 2.1

Development of a sustainable and strategic framework for access to distributed National ENVironmental RI

Activity 2.2

Design and Developing of the national

environmental RIs HUB

Activity 2.3

Support the implementation and the adoption of FAIRenabling best practices

Activity 2.4

Interdisciplinary data interoperability

Deliverables

Del 2.1 - User strategy Del 2.2 - Access Master plan Del. 2.3 - Recommendations for the future National Access Programme

Deliverables

Del 2.4 – ITINERIS HUB Del 2.5 – Catalogue of data and services Del 2.6 – Access Platform

Deliverables

Del 2.7 - State of the Art review of FAIR Del 2.8 Fair Implementation Profiles (FIPs)

- Del 2.9 Design document describing FAIR implementation choices
- Del 2.10 Draft and final Data Management Plan

Deliverables

Del 2.11 - Review on the existing terminologies

- Del 2.12 FAIR terminologies
- Del 2.13 Description of the Terminology Interoperability Framework architecture
- Del 2.14 Release of the ITINERIS TERMINOLOGY service
- Del 2.15 Integration of ITINERIS TERMINOLOGY in three use-cases

Development of a sustainable and strategic framework for access to distributed National ENVironmental RI

ersità Italiadomani cerca

Development of a sustainable and strategic framework for a sustainable a

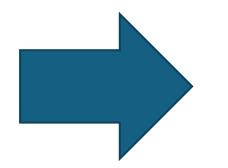

What has been done?

1. Online survey to all the 22 RIs (April 2023)

2. In deep review of User approach and Access practices in ITINERIS RIs

3. Draft of the analysis shared with ACCESS WG (early 2024)

4. Deliverable 2.1 User Strategy – 1st version released

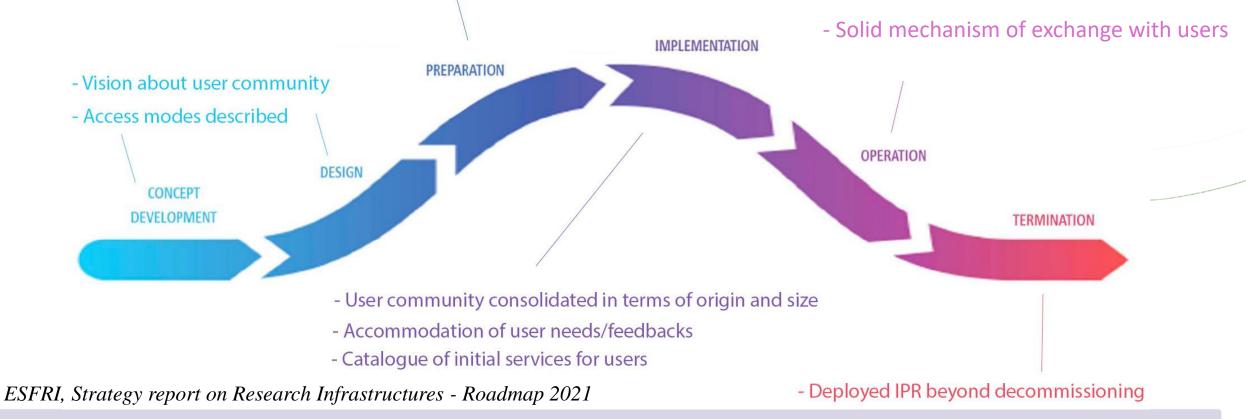

TINERIS

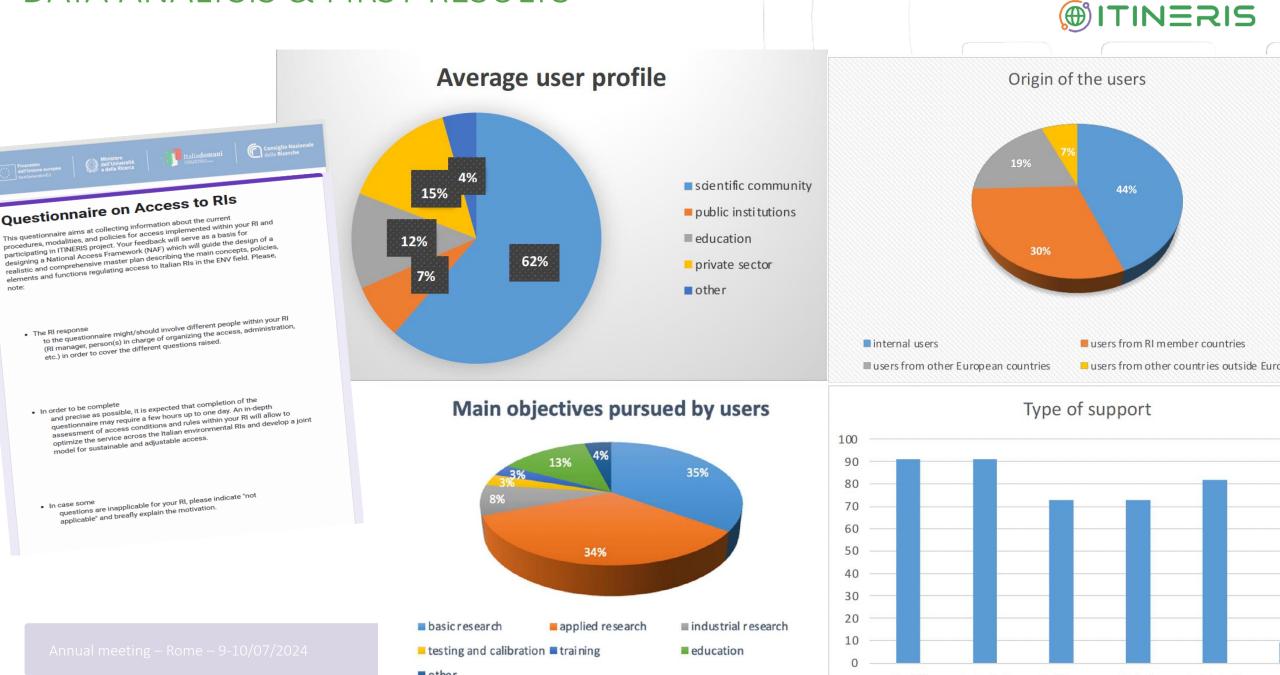

USER & ACCESS IN ESFRI KEY REQUIREMENTS

- Identified user categories
- Survey executed demonstrating expected user community and description of it in terms of origin and size
- Identified services based on a clear identification of user demands and needs
- Single entry point for users outlined

DATA ANALYSIS & FIRST RESULTS

From RIs' user communities towards the ITINERIS USER community

- ITINERIS is intended to promote an holistic, cross-disciplinary approach to the Earth System and its changes, allowing users to benefitting from the integrated system of RIs and enabling each RIs to meet the need of a wider user community.
- ITINERIS aims at generating a multiplier effect by further broadening the user base including new users from the general public, policy makers, private sector and society and intercepting different needs.
- Being ITINERIS in its early stage of planning and implementation, the user community, current and potential, shall still be identified.

ITINERIS RI SOCIAL & ECONOMIC IMPACT on Local Communites: social role of RIs

TINERIS

PILOT ACCESS in ITINERIS

- Access is how the stakeholders' communities use the RIs and have their needs and interests addressed.
- Is in ITINERIS provide virtual access, and many also have their own models and tools to offer physical, remote, or hybrid access to their respective services, which can vary a lot \rightarrow 2 examples:

We will build on commonalities among the RIs to propose harmonized practices to recommend for the Access Management Plan and the national framework for access.

Objective

Establish, test and validate a particular ACTRIS access process tailored to fit the ITINERIS requirements and project general aims

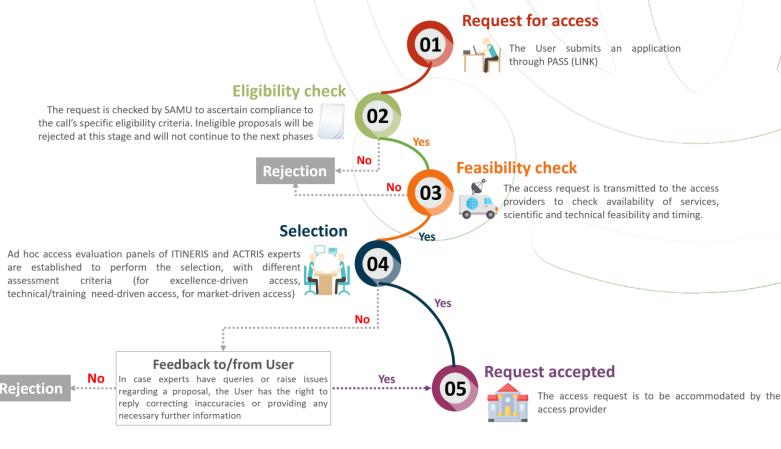

- Programme duration: 16 months (July 2024 October 2025)
- Access that can be provided:
 - $\,\circ\,$ Access of Italian users to all ACTRIS facilities.
 - $\,\circ\,$ Access of foreign users to the Italian ACTRIS Facilities.
- Budget available for:
 - $\,\circ\,$ Paying services of the requested facilities
 - $\,\circ\,$ Supporting the user travel and subsistence costs

ITINERIS TNA Call managed by ACTRIS SAMU

- Application Submission and Selection:
 - Users submit access
 requests through the PASS
 via a dedicated call.
 - SAMU screens the applications for adherence to the access requirements (specific eligibility conditions).
 - Access providers check applications for feasibility
 - Access approved following recommendations from a specific ad-hoc review panel

()

ECORD-IODP and ICDP

HOW TO GET INVOLVED IN ECORD-IODP?

- Sailing IODP expeditions
- Requesting IODP samples
- Submitting new IODP proposals

o sediments and rocks o microbial life o biodiversity DATA o geological data o subseafloor fluids

Ocean drill cores and data are freely available to scientists from all over the world

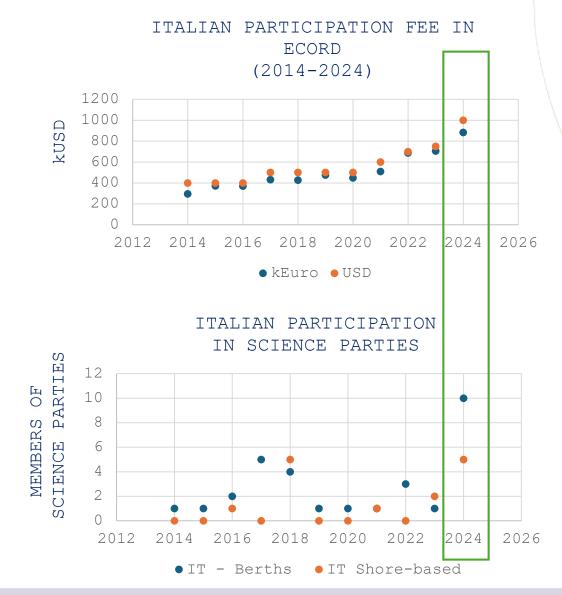

- **ECORD Summer Schools**
- Distinguished Lecturer Program
- **Research Grants**

Open calls are issued by ESSAC (ECORD Science Support and Advisory Committee) to join an Expedition Science Party or for other types of access (research grants, summer schools, etc.)

ESSAC evaluates the scientific quality of all applicants and delivers a short list of highly ranked applicants (Senior scientists, Early Career Researchers (ECR), and PhD Students) to the Ship Operator for the composition of the science party.

Access of researchers/students to the ECORD infrastructure for drilling project/expeditions is proportional to a **membership fee** (access to **legacy data** is open and unrelated to the fee)

ECORD-IODP and ICDP

() ITINERIS

ITINERIS has allowed a remarkable increase in the access of Italian scientists and students to the ECORD infrastructure in 2024.

Impact on access to the ECORD infrastructure in 2024

Next Steps

Harmonized process to be shared with ACCESS WG after summer break

To identify:

- Main management steps ensuring effective, flexible and seamless access
- General Requirements to be met to accommodate the diverse nature of RIs
- Review Panel composition and ToR
- post-access duties
- Access KPIs

Adoption of FAIR practices in ITINERIS Environmental Research Infrastructures

Ilaria Rosati, Enrica Nestola, Gregorio Sgrigna, Andrea Tarallo, Gianmarco Ingrosso

National Research Council – Research Institute on Terrestrial Ecosystems (URT LECCE)

IR0000032 – ITINERIS, Italian Integrated Environmental Research Infrastructures System (D.D. n. 130/2022 - CUP B53C22002150006) Funded by EU - Next Generation EU PNRR-Mission 4 "Education and Research" - Component 2: "From research to business" - Investment 3.1: "Fund for the realisation of an integrated system of research and innovation infrastructures"

Objectives

() ITINERIS

FAIR is a set of principles to.....

What are the FAIR-enabling practices adopted by **ITINERIS RIs**?

Indicate possible solutions to emerging RIs

Support the ITINERIS HUB development Assess the RIs alignment within and outiside ITINERIS Support WPs OUs to FAIRify their outputs

Methodology

1. Online survey to all the 22 RIs (March 2023)

- 2. In-depth review of FAIR-enabling practices adopted by ITINERIS RIs
 - 3. Selection of 13 representative RIs
 - 4. One-to-one interviews (June-July 2023)
 - State of the art of FAIR-enabling best practices (October 2023)
 - FIP & FAIR convergence analysis (May 2024)

TINERIS

Results: State of the art

An example of practices adopted for each principle is given.

(D)

ITINERIS

Results: FAIR Implementation Profile (FIP) & convergence () ITINERIS analysis

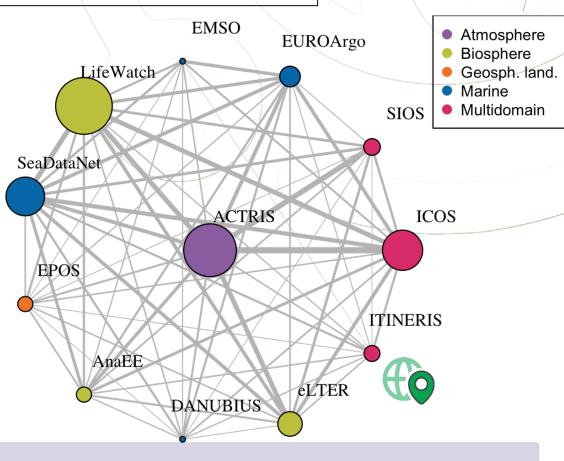

A FIP is a formal list of FAIR implementation choices declared by a specific community to fulfil one or more FAIR subprinciples.

- > A first version of the **ITINERIS Data Hub** FIP
- The potential alignment between the FAIR-enabling practices of the ITINERIS Data Hub and other RIs, within and outside ITINERIS

HOWEVER

- The available FIPs of the different RIs could not be up-todate with the most recent implementations
- The FIP of ITINERIS Data Hub is "planned to use"

FIP Ontology, https://w3id.org/fair/fip/

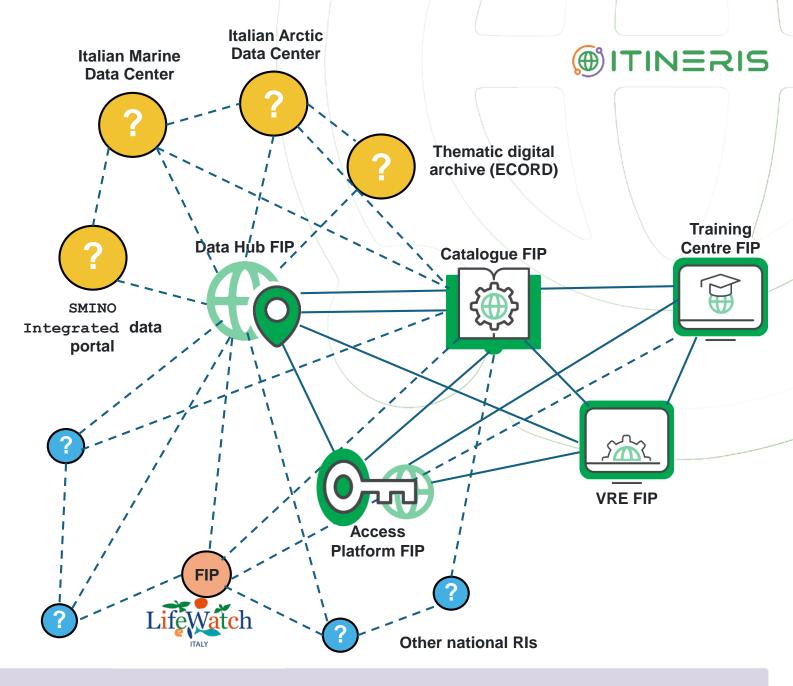

FIP Wizard

Next steps

The future work will consist of:

- Producing new or updated FIPs for the various components of the ITINERIS HUB
- Extending this practice to other national RIs or information management systems developed in ITINERIS

To provide a detailed and rigorous description of the FAIR-enabling practices adopted by different nodes and their level of FAIR convergence and connectivity.

THANKS!
